Dishant Arya

Bangalore , India

Ph No.: +91 6266737174 dishantaryadsa@gmail.com LinkedIn

Summary

Software Engineer with 3+ years of experience in backend and integration systems. Optimized database and API interactions to achieve 35–40% performance gains, improved system scalability, and reduced processing latency. Skilled in Java, Spring Boot, C#, React.js, modern CI/CD Practices, and building high-performance, distributed applications.

Experience

- **Itron** Bangalore, India
  Software Engineer *Aug. 2023 - Present*
  - **Built** and **optimized** microservices-based data integration platform using **Java, C#, React.js,** and **Kafka** to process high-volume utility data across distributed systems.
  - Collaborated with cross-functional teams in **Agile** environments to deliver scalable solutions.
    - **Integration Management Service (Enterprise Data Integration Platform)**
      - Implemented **Kafka-based** event streaming to process and distribute millions of utility records in real time.
      - Designed and optimized REST APIs handling high-volume **20M+** records, improving throughput and reducing processing latency.
      - Designed **rule-based runtime configuration** to **modify integration service behavior** and data flow dynamically without service restarts.
      - Built an automated end-to-end **data integrity validation service** across Azure Files, Service Bus, Kafka, and Data Lake, **reducing manual testing effort by 60%** while ensuring data consistency.
      - Developed **React.js-based UI components** to visualize high-volume integration data, enabling complex interactions while maintaining performance and cross-framework compatibility.
      - Implemented automated pipelines for **schema versioning and deployment** of dataflows across multiple production environments, improving reliability and release consistency.

- **Chaayos** Gurgaon, India
  Junior Software Engineer *Jul. 2022 - Feb.2023*
    - **Supply Module:**
      - Worked in team of 3 Developers whose end Product is used by **200+ cafes, kitchens, and warehouses**.
      - Improved Goods Received Settlement and Rejection.
      - Updated **Capex Module Flows and Payments** Received Flows.
      - Revamped Work Order Creation and their Approval.
      - Automated **Outward Register** processing system, improving inventory tracking and **reducing manual operational effort by 40%.**

- **Highradius** Bhubaneshwar, India
  Software Engineer Intern *Jun. 2022 - Jul.2022*
  - Developed backend components using Java and participated in the enterprise software development lifecycle.

Technical Skills

Languages: Java, C#, JavaScript, TypeScript, SQL
Frameworks: Spring Boot, Hibernate, ASP.NET, React.js
Streaming & Messaging: Apache Kafka, Event-Driven Architecture
Backend Architecture: Microservices Architecture, RESTful API Design, Distributed Systems, System Design
Databases: PostgreSQL, MongoDB
Cloud & DevOps: Azure DevOps, AWS (EC2, S3, CloudWatch), CI/CD Pipelines, Docker, Terraform (Basic), Cloud Monitoring
Developer Tools: Git, Linux

Education

- **Kalinga Institute of Industrial Technology** Bhubaneswar, India
  B.Tech in Computer Science and Engineering (CGPA: 9.07) *Jul 2019 – Jun 2023*
  Coursework: OOPs, Operating Systems, DBMS, Computer Networks
